

## Prince George Woodturning Guild Meeting

November 27, 2014

Members present:

Ron, Ken, Bob, Max, Art, Martin, George, Rory, Ray and Mark

### Business

4 members participated in the Duchess Park Craft Fair. Sales were not good; Studio Fair was much more successful. The Guild seems to have done quite well financially this year despite putting on the Al Stirt Workshop and attending Craft Fairs. A discussion was held on whether or not we should look at getting another Guest Turner for next year. The December meeting will be held on December 18<sup>th</sup> as Christmas falls on the last Thursday of the month. Thursday evenings are open @ the Gallery for members to come down and play with the lathes. A discussion took place on the use of Centre Saving tools, the One Way and the McNaughton systems. It was agreed that we would hold a demo on each at a later date.

### Demonstration

A discussion and demonstration on the use of different sanding tools was held. Ron demonstrated a variety of different devices many of which Ron had made. A discussion was held on progression sanding and using the reverse function of the lathe. Members are reminded to ensure that the chuck is locked before changing direction.

### Wood draw

A successful wood draw was held, thank you Bob.
